For more information, see http://nces.ed.gov/ipeds.

The 1994 classification system created by the Carnegie
Foundation for the Advancement of Teaching is included in the
IPEDS data files to help users of this information further
delineate institutions by type. This classification, which dates
back to 1970, currently includes approximately 3,600 colleges and
universities in the United States that are degree-granting and
accredited by an agency recognized by the Secretary, U.S.
Department of Education. The 10 categories that make up the new
classification scheme are based largely on academic mission and
are not intended to measure quality. Institutions are classified
according to their highest level of offering, the number of
degrees conferred by discipline, and the amount of federal
support for research received by the institution. Some
categories also rely on the selectivity of the institution's
admissions. Information provided by the Carnegie Foundation was
matched against the IPEDS Institutional Characteristics file and
the codes are indicated in the institutional listings where
matches were certain. It is important for users to note that
IPEDS includes separate listings for all branches of an
institution, whereas, in some instances, Carnegie lists only one
campus (which encompasses the main campus and all branches).
